DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Dallmer (4,744,422). Dallmer shows a hoofshoe having at least one protecting portion 11 and a fixing portion 31 such that the protecting portion 11 having a sole 10 and a cap 11 having front and both sides and the fixing portion 31 having a heel portion 31 and two side tabs 34 and a fixing device 37 which attaches the heel portion 31 to the sole 10 inasmuch as applicant's does and are adjustable 37b, 34a and enable the hoofshoe a firm hold. The fixing portion 31 being completely detached from the protecting portion, col. 2, lines 46-49 and having a padding 36 for protection. The cap portion 11 having notches 12 to accommodate hooves of various steepness. The fixing devices 37 being straps and loops or hooks 23.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3644

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dallmer in view of Rohner (4,736,800). Dallmer does not disclose the use of a non-slip profile on the sole. Rohner shows a hoofshoe 4 having a sole 5 with metal pins 7 and a profile 6 for non-slip gripping. With respect to claim 6, to use the profile of Rohner with the sole of Dallmer would have been obvious to one skilled in the art in order to provide better traction and footing for the animal wearing the shoe.

Allowable Subject Matter

Claims 5 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Glass (3,732,929), Paiso et al (3,794,119), Marquis (6,305,328), Barclay (830,403) and Nickerson (719687).
